1.10 Student Services

ADSM students are primarily working professionals who require very different services than a traditional undergraduate student. To meet the needs of the unique student population, Student Services at ADSM have been focused to meet each student's needs effectively. Starting with prospective students, ADSM's Recruitment Team provides applicants with accurate and detailed information. This includes admissions requirements, deadlines, requirements for verified documents, scholarships, etc. The Recruitment Team frequently arranges Information Sessions, during which, prospective students have the opportunity to meet ADSM's faculty and discuss with them the details of each program offered at ADSM. The Recruitment Team may also arrange for prospective students to meet with faculty of the program they are considering, to ensure that they are fully aware of program requirements and are choosing the program that fits their career aspirations.

The Office of Student Affairs arranges an Orientation Session at the commencement of all new cohort intakes. Topics covered aim to assist students in settling into graduate studies. The Orientation includes a session on Case Study Analysis to give students an insight into the type of work expected at a graduate level. Orientation also includes a session on the e-library, the physical library, and IT resources, along with information regarding ADSM policies and procedures. The orientation provides

an opportunity for new students to meet academic and professional staff, and to meet fellow classmates and future colleagues.

Throughout their journey at ADSM, the Office of Student Affairs systematically monitors students' performance to provide them with the necessary support to maintain good academic standing and complete their program of study successfully. The Office regularly conducts an audit on students' performance to identify students who were not able to maintain adequate academic standing with a Cumulative Grade Point Average (CGPA) above the minimum threshold of 3.0, or were not able to meet the conditions of their acceptance. The Office then communicates with the identified students to provide them with support and guide them to benefit from the services provided at the Academic Support Center.

The Office also arranges academic support sessions, in collaboration with the Academic Support Center, aiming to support the academic development of students. Although the vast majority of ADSM's students are working professionals, the Office ensures that students have access to career services in collaboration with the Academic Support Center. The career services range from advice on CV writing and interview skills, to career planning and counselling. Furthermore, through channeling the work of Community Engagement, the Office hosts talks by prospective employers and developing industries provide students with the opportunity to identify emerging career opportunities.

For 2020 – 2021 AY, the full time faculty to student ratio at ADSM stood at 1:20. Currently all ADSM's faculty are considered international, and the full time equivalent (FTE) international faculty to faculty ratio is 1:1. ADSM's current overall student satisfaction rate is 97.5%.

A status of “In Progress” (IP) may be awarded to a student at ADSM as per the Grading and Assessment Policy, which is found on the ADSM Student [WebPortal](https://lms.adsm.ac.ae) (lms.adsm.ac.ae). It is the responsibility of the student to resolve the IP grade according to the directions given and within the permitted timeframe as detailed in the policy. Students who do not make up incomplete work within the specified time periods will receive a final grade from the instructor based on normal class requirements, with a numerical value of “0” calculated into the final grade for all items that remain incomplete at the end of the time period.

2.8 Grade Disputes

ADSM permits the review of class grades subject to the parameters and timeframes that are detailed in the current versions of P 419 Student Appeals Policy and P 303 Grade Approval and Change Policy are appended to this Catalog and can be found at the ADSM Student [WebPortal](https://lms.adsm.ac.ae) (lms.adsm.ac.ae).

Successful requests are granted with specific expiration dates and conditions for return to ADSM.

2.12 Deadlines for Dropping or Withdrawing from Courses

Ceasing to attend class does not constitute an official withdrawal. Students must notify the Office of Student Affairs before the withdrawal date in order to withdraw from a course. Students not officially withdrawing from a subject will be awarded a final grade based on the normal course requirements, with a numerical value of “0” calculated into the final grade for all course requirements not completed. Withdrawals also depend on specific timeframes within a term and are thus limited to specific periods that are designated on the official ADSM academic calendar. Grade and financial repercussions depend on when a withdrawal is made according to P 313 ADSM Academic Progress Policy and P 411 Student Finance Policy which are appended to this Catalog, and can be found online at the ADSM Student [WebPortal](https://lms.adsm.ac.ae) (lms.adsm.ac.ae).

2.13 Withdrawal from ADSM

Students can withdraw completely from ADSM but must do so according to processes enumerated in P 313 Academic Progress Policy and at specific dates in order to avoid academic and financial penalties. A student who withdraws from a program without properly filling in the appropriate forms is financially responsible for the program cost according to the schedule contained in P 411 Student Financial Policy, appended to this Catalog, and can be found at the ADSM Student [WebPortal](https://lms.adsm.ac.ae) (lms.adsm.ac.ae). Failure to withdraw without following official regulations will subject the student to penalties as well as possible legal recourse.

2.14 Mandatory Leave/Withdrawal

ADSM reserves the right to determine, at its discretion, that each student is participating successfully in the School's educational and co-curricular programs. Furthermore, ADSM reserves the right to determine whether a student's behavior complies with the School's rules, regulations, and policies; that it does not impede another student's performance, threaten anyone's safety, or otherwise disrupt the School's operations.

2.15 Readmission to ADSM

In order to be readmitted once having officially withdrawn from ADSM, students must go through the application for readmission process. This readmission process consists of a letter of request to the Registrar. In this letter, the student must address his or her reason for wanting to return, how the student has addressed any issues that resulted in the withdrawal, and how the student will use any resources to aid in his or her academic performance and/or other concerns. Readmission will also be dependent on any sanctions that may have been imposed by the Student Disciplinary Committee, if any.

4.0 Academic Integrity, Code of Conduct, and Grievances

4.1 Academic Integrity at ADSM

The School is committed to be an international leader in management education. The School focuses on educating innovative leaders capable of initiating, managing, and implementing change. Consistent with this mission, ADSM welcomes diversity within its community and requires each member to respect the values of other members of the community. To maintain the integrity of the diverse cultures, present at ADSM, certain standards of academic conduct must be adhered to by each graduate student, faculty member, staff member, and administrator throughout his or her experience at the School. Every member of the ADSM community is required to uphold the principles embodied in the Academic Integrity Policy.

All members of the School community, students, faculty, and staff, share responsibility to bring forward known acts of apparent academic dishonesty. Any member of the academic community who witnesses or otherwise becomes aware of an act of academic dishonesty should report it to the appropriate faculty member or to the Program Director.

ADSM's P 418 Academic Integrity Policy is a comprehensive review of the School's requirements in this regard as well as the various penalties for breaches of the policy. This policy is closely associated with P 414 Student Rights and Responsibility Policy and P 603 Appropriate Use of Technology Policy. All policies are appended to this Catalog, can be found online at the ADSM Student [WebPortal](http://lms.adsm.ac.ae) (lms.adsm.ac.ae).

Because of the seriousness of academic integrity and to avoid the possible misunderstandings made by new students, the following is a list of some examples of what can constitute academic dishonesty:

Cheating: Cheating is any form of fraudulent or deceptive academic act, including intentionally using or attempting to use unauthorized materials, information, or study aids in any academic exercise. Examples of Cheating:

- Unauthorized use of notes, text, or other aids during an assessment.
- Copying from another student's assessment, research paper, case write-up, lab report, homework, computer disk, flash drive, etc.
- Handing in the same paper/assignment/components of a paper for more than one course without the written or explicit permission of the instructors.
- Sabotaging another student's work or record.
- Receiving assistance/help on an academic exercise from another person/resource without the expressed permission of the instructor.

Duplicate Submission: Duplicate submission is the submitting of the same or similar work for credit in more than one course without prior approval of the instructors for those same courses.

Plagiarism: Plagiarism is the representation of others' ideas as one's own without giving proper attribution to the original author(s). Plagiarism occurs when a student copies direct phrases from a text (e.g. books, journals, and internet) and does not provide quotation marks or paraphrases or summarizes those ideas without giving credit to the author(s). In all cases, if such information is not

properly and accurately documented with appropriate credit given, then the student has committed plagiarism.

Fabrication: The intentional and unauthorized falsification, misrepresentation, or invention of information, data, or citation in an academic exercise. Examples of fabrication:

- Making up the data for a research project.
- Altering the results of a lab experiment or survey.
- Listing a citation for a source not used.
- Stating an opinion as a scientifically proven fact.

Facilitating Academic Dishonesty: Intentionally or knowingly helping or attempting to help another to violate any provision of this policy. Examples of facilitating academic dishonesty:

- Inaccurately listing as co-author of a paper, case write-up, or project someone who did not contribute.
- Sharing a take-home assessment, homework assignment, case write-up, lab report, etc. with another without the expressed permission of the instructor.
- Taking an assessment or writing a paper for another student.

4.2 ADSM Student Code of Conduct

Members of the ADSM community are expected to observe and respect the personal and property rights of others. The responsibility of all students to comply with laws, ordinances, bylaws, and regulations applies both on and off campus. It is expected that the instructors, staff, and students of ADSM conduct themselves in a professional and respectful manner that befits a prestigious institution of learning. ADSM expects its students to adhere to the Code of Conduct, as detailed in P 115 Code of Conduct Policy, appended to this Catalog and available on the ADSM Student [WebPortal](http://lms.adsm.ac.ae) (lms.adsm.ac.ae).

The P 115 Code of Conduct Policy is closely related to P 414 Student Rights and Responsibilities Policy as well as P 418 Academic Integrity Policy and P 603 Appropriate Use of Technology Policy. However, it is impossible to cover every standard of behavior. Therefore, these policies, which are appended to this Catalog, and available on the ADSM Student [WebPortal](http://lms.adsm.ac.ae) (lms.adsm.ac.ae), do not constitute a comprehensive code of conduct, but are instead a set of guidelines necessary for meeting the practical, routine requirements of an academic community.

ADSM affirms its commitment to strive for a fair, humane, and respectful environment for all employees and students. It is the policy of the School to maintain a working and learning environment that values and expects respectful conduct and communication. Every member of the ADSM community has the right to live, learn, work, and otherwise participate in an environment that is free from all forms of harassment by any other member of the community. The School encourages freedom of inquiry, opinion, and speech, and it will defend the right of anyone to express his or her views. However, the right of expression must be exercised responsibly without depriving others of their right to enjoy this and all other opportunities provided by the School with respect to the laws, culture and heritage of the United Arab Emirates.

As a general overview of topics of primary importance to the conduct of instructors, staff, and students at ADSM, the following types of unacceptable behavior are specifically enumerated in the Student Rights and Responsibility Policy:

- Disorderly Conduct
- Smoking Outside of Designated Areas
- Harassment
- Possession of Weapons
- Providing False Information and Misrepresentation
- Theft/Damage/Vandalism of or to Personal, School, or Public Property
- Unauthorized Entry into School Facilities

4.3 Computer Ethics and Usage

Computer abuse affects everyone who uses computing facilities and results in significant expense to the School. Therefore, ADSM policies regarding computer usage and use of the Wi-Fi network apply to ADSM students, faculty, and staff. In general, the same moral and ethical behaviors that apply in the non-computing environment apply in the computing environment. Actions that are unacceptable in the School community also are unacceptable on the network, computing systems and other electronic services including:

- Harassment in any form
- Failure to respect the rights and property of others
- Forgery or other misrepresentation of one's identity
- Distribution, redistribution, attempted downloading, or downloading of copyrighted materials without the permission of the copyright owner.

It is the responsibility of each ADSM community member to use the services provided by the School's campus network and computing systems appropriately and in compliance with all laws and regulations. Furthermore, users are expected to use computer, electronic mail, and network services in an effective, ethical, responsible, and efficient manner consistent with the instructional, research, public service, and administrative goals of the School.

ADSM treats access and usage violations seriously. Access to the School computing facilities and information resources is a privilege and may be restricted or terminated at the School's sole discretion. In addition, more severe disciplinary actions can be taken according to the terms of the ADSM P 603 Appropriate Use of Technology Policy, which is appended to this Catalog, and can be found online at the ADSM Student [WebPortal](http://lms.adsm.ac.ae) (lms.adsm.ac.ae). Violations to this policy may result in disciplinary action and possible prosecution by government officials.

4.4 Resolution of Complaints

The policy and procedures for the investigation of violations, the application of disciplinary actions, and the various rights of the affected party to appeal the decision are contained in P 419 Student Appeals Policy and P 420 Student Disciplinary Policy.

In Summary, students are advised to attempt to resolve each situation through informal channels. If after making a good-faith effort to reach an amicable resolution, no resolution has been reached, the student may utilize the procedures outlined within the related policy.

Students wishing to request grade appeals should follow the principles and procedures stipulated in P 303 Grade Approval and Change Policy. For other academic appeals, students must follow P 419

Student Appeals Policy, basically students must submit a signed Appeals Form to the Office of Student Affairs. The Office will advise and guide the student through the process.

For non-academic matters, arising from alleged violations of ADSM policies, students should follow the principles and procedures stipulated in P 420 Student Grievances Policy. Students must submit a signed Grievance Form to the Office of Student Affairs, and the Office will advise and guide the student through the process.

All related policies are appended to this Catalog, and can be found online at the ADSM Student [WebPortal](https://lms.adsm.ac.ae) (lms.adsm.ac.ae).

5.0 Master of Business Administration (MBA)

ADSM's MBA program is one of the critical links in fulfilling ADSM's mission to develop entrepreneurial managers who can enhance existing managerial capacity and also encourage the growth of entrepreneurial ventures in the UAE. Aimed at prospective MBAs who demonstrate entrepreneurial behaviors, we develop global leaders with both a strong business foundation as well as an entrepreneurial mindset. We do this by combining a holistic integration of the traditional business disciplines interwoven with our approach of teaching the entrepreneurial thought process. As a result, our graduates succeed across the entire spectrum of global organizations needing leaders. 5.7 The Signature Learning Experience (SLE)

ADSM's MBA program incorporates Signature Learning Experiences (SLEs) into the curriculum to develop entrepreneurial leaders. These educational experiences occur throughout the program, giving students the opportunity to integrate the knowledge gained in the classroom and apply it to entrepreneurial decision making. The focus is not only on the development of the business skills

necessary to be successful in an ever-changing global environment, but also to give the students the skill sets necessary to manage themselves and others in this context. The SLEs also emphasize the importance of strong communication skills, plus an ethical and societal approach to decision making, all in the context of a global economic environment. Here are a few examples of how these experiences are brought to life:

Idea Creation: Creating is the first step in Entrepreneurial Thought and Action. Students will explore and experience something new as they are challenged to take risks, make a difference, and to be innovative and unconventional. Student groups will develop and deliver a creativity presentation to their MBA peers, faculty, and the ADSM community.

Team Building: Students tackle the question of how to build effective teams. Through a range of activities, students gain insights into their own and into their peers' behavior in teams. Students also have an opportunity to practice giving and receiving feedback and use tools to help others contribute positively to team endeavors.

Feasibility Analysis: Once students have an idea in mind, the next step is to analyze its feasibility. Feasibility is critical, whether one is interested in new venture creation, corporate or social entrepreneurship, or any new project or process. In this project, students work to understand the customer group and its needs, assess the durability of the opportunity, understand the competitive landscape and identify possible business models that provide value to both the business and its stakeholders.

5.8 Mode of Delivery

The MBA program is offered in a traditional face-to-face teaching mode. The program is offered in a modular format with each module offered in an intensive format. 15 contact hours are delivered for each credit and a 2-credit course involves a minimum of 30 hours of instruction. The Signature Learning Experience (SLE) is delivered in a workshop format. A 2-credit course is typically delivered as per below:

Self-paced reading session (1 week prior to the start of class)	5 hours
Thursday	4:30 – 9:30 pm (5 hours)
Friday	4:00 – 9:30 pm (5.5 hours)
Saturday	9:30 am – 3:30 pm (6 hours)
Thursday	4:30 – 9:30 pm (5 hours)
Friday	4:00 – 9:30 pm (5.5 hours)
Saturday	9:30 am – 3:30 pm (6 hours)
Total Contact Hours	33 Hours

5.11 Course Descriptions

5.11.1 MBA Core Courses

Such internal information is important when launching a new venture, maintaining or growing the market position of an existing venture. This course develops the core management accounting tools, techniques, and frameworks to analyze cost information and assess performance. Students learn how to critically analyze costs out of new or existing products and processes, and to assess the financial feasibility of entering new markets and to manage sustainable organizations. The purpose and impact of introducing a value-added tax (VAT) on businesses and consequently pricing products in the U.A.E becomes one of the valuable inputs of this course for students and professionals.

Working from these concepts, the course will then explore what they mean for managers and how they can inform innovation strategies and interventions.

The course develops students' knowledge and understanding of the variety of issues and perceptions relating to the development, deployment and application of business information systems in an organizational context.

MKT 6210 Marketing (2 credits)

Not all businesses are created equal. More often than not organizations spend resources developing and marketing new products/services only to discover that consumer response is far less ecstatic than expected. The reality is that in most cases consumers are indifferent about the business offerings. To succeed, a business must make a compelling case in terms of consumer experience, deeper purpose, social value, and greater inspiration for consumers as well as employees. Effective marketing management requires a clear understanding of consumers and the market in general. The aims of this course are to help participants understand how marketing contributes to business competitiveness and survival and to provide participants with critical strategic marketing insights, tools, and techniques. Students also gain an understanding of marketing research and its value in analyzing consumers, markets, and the environment.

MGT 6410 Strategy (2 credits)

Strategy, at its most general, refers to the allocation of resources in a competitive environment over relatively long periods of time in the pursuit of specific goals. Strategy is shaped by the underlying market conditions as well as the resources available to management (including the firm's internal structure, systems, and culture). This integration of the external and internal perspectives provides the basic framework for strategic thinking. This course aims to enable students to understand and appreciate the organizational context in which strategic decisions are made. The ADSM Strategy course is intended to give the MBA class a holistic view of the firm; to develop students' ability to think beyond day-to-day business activities; and to challenge them to ask the right questions about its future. These skills are essential for an effective general manager.

LDC 6310 Leadership (2 credits)

Management consists of a set of universal skills that are well understood and can be learned. One of the most important of these skills is leadership. Leadership consists of how each one of us makes a unique difference to the challenges we face with people and projects. It is not about wasting our energy trying to be something we are not. Instead, it is finding new and better ways of 'being ourselves' through enhanced insight and skill. Therefore, our focus in this leadership course will be to help you become more aware of your personality traits through diagnosis (questionnaire assessment exercises), your strengths and weaknesses as a leader through insight (introspection and reflection on one's traits, habits, and behaviors) and to build on this knowledge to improve your leadership practice through self-development (plans to learn and change to more effectively tackle future challenges).

OPS 6310 Operations Management (2 credits)

Managing operations is vital to every type of organization, for it is only through effective and efficient utilization of resources that an organization can be successful in the long run. This is especially true today, when we see that significant competitive advantages accrue to those firms that manage their operations effectively. This class defines operations in the broadest sense, not confining the focus within a set of walls but defining the scope to the thoughts and activities necessary to supply goods and services from conception to consumption. It introduces students to the operational challenges that managers face and provides a set of tools to aid in designing, evaluating and managing business processes to meet company objectives. The course objective is to study how management can gain competitive advantage through operations.

RES 8120 Research Methods for Business (2 credits)

Managers are continuously working towards improving the decision-making process and being able to adapt such decisions to market competitiveness. This course enables students to develop their knowledge about scientific research and relate challenges faced by organizations to theoretical frameworks. It guides students to explore concepts and present theoretical debates that rely on different approaches required to reach a scientific opinion. When applying research process and appraising critical reflection on arguments, students are able to discuss findings on specific research question(s) of their business-related interest.

LAW 6310 UAE Legal and Regulatory Environment (2 credits)

This course analyzes legal issues as they relate to forming and a running a business. Topics include the UAE legal tradition and court system, the various tools and methods for protecting intellectual property in the UAE, business law terminology such as liability, types of business structures, and the necessary steps for starting a business in Abu Dhabi.

OB 6210 Organizational Behavior (2 credits)

Organizational behavior examines the relationship between the individual, the group and the organization. This course aims to develop a critical understanding of how people behave in organizations and the factors that drive their behavior through such topics as entrepreneurial leadership, motivation and its applications, emotional intelligence, and negotiation styles. The course is designed to enhance managerial/leadership capabilities by providing a better perspective of human attitudes and behavior, enabling the identification and application of factors that motivate personnel to perform better in the workplace. The course develops skills to understand group dynamics, apply negotiation techniques and thereby perform and/or lead effectively in an organizational environment.

5.11.2 MBA Elective Courses

ECN 6420 International Economics (2 credits)

This is an international macroeconomics course that focuses on the interactions among credit markets, goods and services markets, and foreign exchange markets. This global framework is used to explain changes in a nation's economic health, its economic impacts on foreign countries, and the effects of government and central bank policies. This course develops and applies macroeconomic theories that relate the domestic economy (real and financial) to the global market with particular emphasis on nations' monetary, banking, and financial systems. It also develops the cause and effect relationships among important macroeconomic variables, such as GDP (economic growth), inflation, unemployment, interest rates, and exchange rates. Additionally, it explores interconnections among, and effectiveness of, the central bank, treasury, and other government agencies in regulating domestic and international financial markets.

QTM 6210 Decision Analysis (2 credits)

This course introduces you to Management Science, which is the study of advanced analytical and computational methods to support effective and informed managerial decision-making. The principal idea in Management Science is to formulate managerial decision problems as mathematical problems, which can subsequently be solved using analytical or numerical techniques. Typical applications include revenue management (e.g. revenue-maximal pricing of train and airline tickets), logistics (cost-effective transport of products in a supply chain), financial portfolio management (construction of asset portfolios with a desirable return/risk tradeoff) and production planning (e.g., reduction of late deliveries or inventory holding costs).

This course emphasizes the strategic role of the human resource function within organizations, and provides a framework for understanding how human resource management (HRM) strategies link with and facilitate attainment of organizational level strategies. The course draws on insights from the social sciences and strategic management theory to explore how economic, socio-cultural, psychological, legal and environmental forces influence employment relations. Specific topics include an overview of the links between organizational strategy and HRM, Global and legal aspects of HRM, HR planning and alignment, recruitment and selection; compensation and benefits; promotion, training; layoffs; retention and turnover; and the human resource implications of various strategies.

IT 6210 Global Connections through Technology (2 credits)

Some of the biggest challenges that leaders face in a twenty-first century organization are managing technology, process and people. Computers and technology-mediated networks have transformed global economies, creating new opportunities and challenging the traditional way of doing business. In such environments, business organizations can remain competitive only to the extent they can leverage information technology. Successful managers must fully understand information technology landscape, knowing when and how to implement and use IT to gather and analyze information, build stronger relationships with suppliers and customers, increase production efficiencies, spur innovation, and improve organizational flexibility. Most importantly, technology can be used to create new products and services.

The goal of this course is to introduce students to the most important aspects of advanced information technology to support business success.

6.11 MSQBE Course Descriptions

6.11.1 MSQBE Core Courses

RES 8111 Research Methods (3 credits)

This course provides an opportunity for students to establish or advance their understanding of research through critical exploration of research language, ethics, and approaches. The course introduces the language of research, ethical principles and challenges, and the elements of the research process within quantitative, qualitative, and mixed methods approaches. Participants will use these theoretical underpinnings to begin to critically review literature relevant to their field or interests and determine how research findings are useful in informing their understanding of their environment (work, social, local, global).

QTY 8212 Quality Management Systems and Approaches (3 credits)

In recent years “quality” and “quality management systems” have been leading buzzwords in the business world. Management systems define quality levels in the manufacturing of goods and production of services. However, there is seldom comment on the commercial viability of the output itself. This course develops student understanding of the management principles, disciplines and techniques involved in quality management systems within, and their impact external to an organization. The environmental relationships between the various elements in an organization must also be clearly understood to allow managers to appropriately assess the impacts of any change, on operations and/or business strategy. The course aims to enhance student awareness of management systems, approaches, and applications in today’s business landscape, whilst also providing an appreciation of the decision making in organizational risk management.

QTY 8213 Business Excellence Awards and Frameworks (3 credits)

This course focuses on the need to be able to understand and support initiatives introduced to organizations for achieving global competitive advantage. In particular, they need to be able to understand the business consequences of following different courses of action in improvement activities leading ultimately to excellence in customer satisfaction, employee satisfaction, and impact on society and business results. Excellence in a business context is a combination of internal excellence in how things are done (enablers) leading to outstanding business performance (results). Excellence is recognized worldwide through awards such as the European Quality Award, the Baldrige Award and the Deming Award as well as national awards that are based on these. This course introduces the fundamental concepts that underpin non-prescriptive approaches to creating sustainable excellence in a business, and provides an opportunity for students to critically reflect on the skills necessary to manage the business processes of organizations in the way they do business, and in their relationships with their employees, shareholders, customers and communities in which they operate.
